

FCC-Satellite radio provides a quality and variety that are not available in my local area. I benefit from XM radio for the traffic and weather updates of the Bay Area. I pay for these services and I should have access to them. It should not be up to another organization, such as the NAB, to tell me what I have the right to listen to on a radio service that I pay for every year. Please reject the NAB's petition 04-160 in limiting the product that I subscribe to.

Sincerely,

Rebecca Magnia
